Practice Identifying Biological Molecules

Step 1 Identify each of the molecules using the word list below

Step 2 Cut out the cards, mix them up and try to match them up again

Step 3 Continue mixing them and matching them until you are 100% comfortable with the diagrams!

Monosaccharide (glucose)

Disaccharide (maltose)

Polysaccharide (starch)

Polysaccharide (cellulose)

Polysaccharide (glycogen)

Glycerol

• Saturated fatty acid

Unsaturated fatty acid

• Steroid

Phospholipid

Amino acid

• Polypeptide (protein)

• Nucleotide

• DNA

RNA

ATP

Step 4 Remember that the diagrams you see on the quiz or test may be DIFFERENT than these
