## **Biology 12**

Cell Biology

## **Practice Identifying Biological Molecules**

Step 1 Identify each of the molecules using the word list below

Step 2 Cut out the cards, mix them up and try to match them up again

## Step 3 Continue mixing them and matching them until you are 100% comfortable with the diagrams!

- Monosaccharide (glucose) •
- Saturated fatty acid •
- Disaccharide (maltose)
- Unsaturated fatty acid Steroid

•

•

•

- Polysaccharide (starch) ٠
- Polysaccharide (cellulose) •
- Polysaccharide (glycogen) •

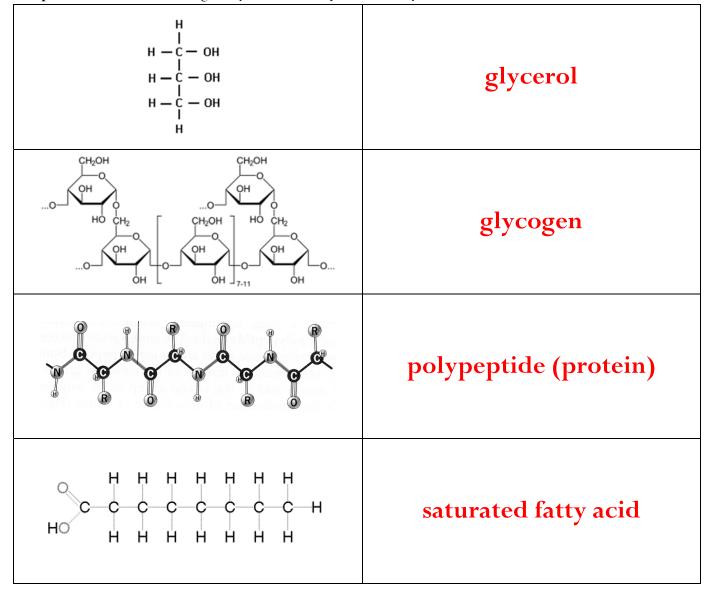

Glycerol

•

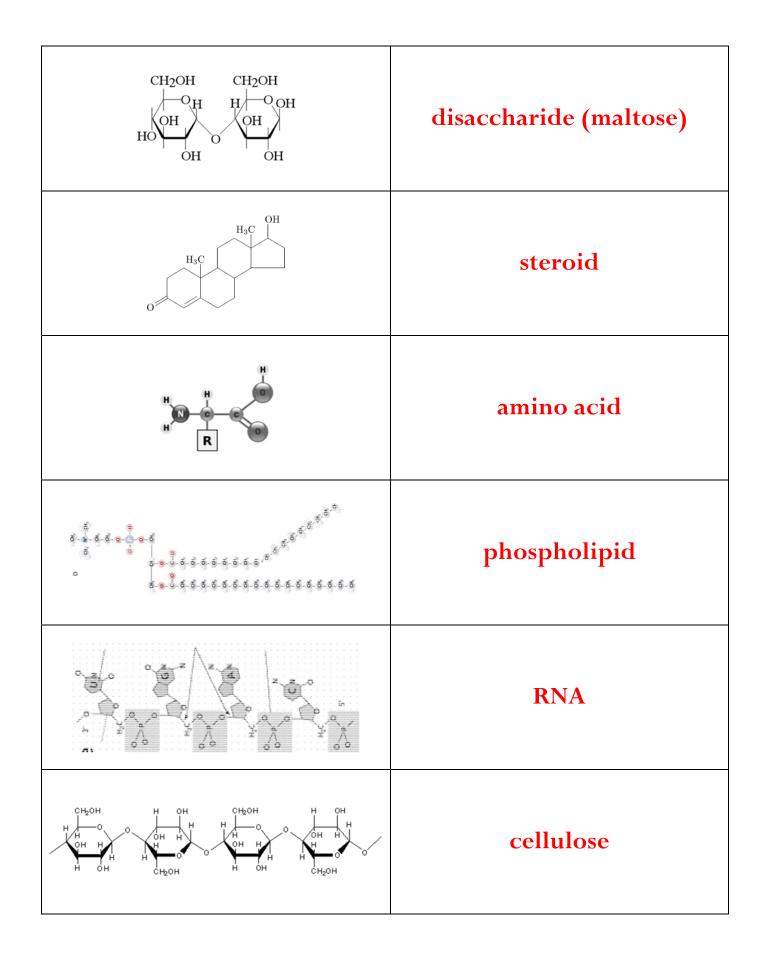

Amino acid • Polypeptide (protein)

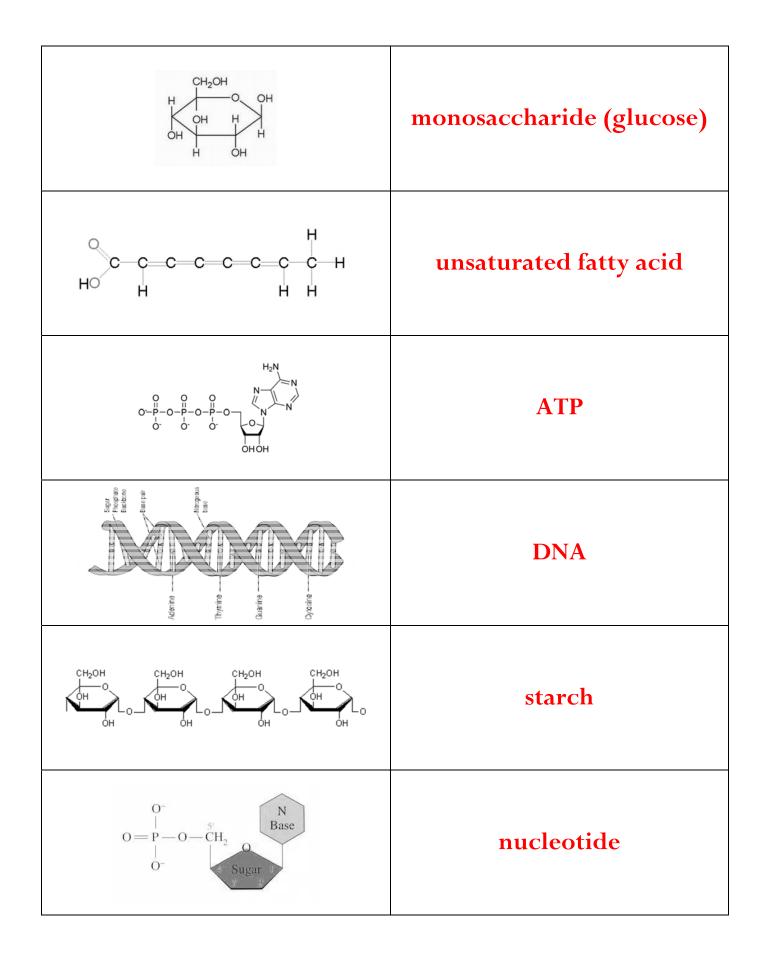

Phospholipid

Step 4 Remember that the diagrams you see on the quiz or test may be DIFFERENT than these

- - Nucleotide DNA
  - RNA
  - ATP

## What about these ones?
